

A Message of Light

Please help spread the message of light in whatever ways you can.

What is the message?

The message that we all need to consider and act on is this:

- There is too much darkness in our country and the world
- We have an urgent need for more light!
- Each of us has a part to play in bringing more light
- Every interaction we have with others can deposit either light or darkness into the environment around us
- We should use the influence we have to help spread the message of light and work to increase our own light

This is the message that drives Lightward Bound's work to bring more light.

Light—it's the only answer!
